## INTRODUCTION

The first Union list of Restoration Periodicals was published in 1975 as a result of discussions held at the first meeting of the Christian college librarians at Oklahoma Christian College in the spring of 1974. R. L. Roberts edited a second edition in 1982. At the May 1993 meeting of the Christian college librarians at Abilene Christian University I was asked to edit an update of the list.

The 1982 edition was scanned into a database and became the starting point for this edition. The format was changed to include separate entries for each title under which a periodical was published. New titles which are connected with the American Restoration Movement were added. These included periodicals published by people and institutions associated with the Christian Church (Disciples of Christ), Christian Churches & Churches of Christ (sometimes called the Conservative or Independent Christian Church), and the Churches of Christ (non-instrumental). Among those items not included were church bulletins, college catalogs, college yearbooks, lectureship books, and mission reports which dealt only with the work of one person or family.

In May 1995 a working copy was distributed to the libraries of twenty educational institutions affiliated with the Churches of Christ. Each was asked to correct its holdings, add new holdings, and suggest new titles which should be added to the list. Fourteen institutions responded and their changes were added to the database.

Thanks to John Nunnally, Director of Information Services at Harding University, for scanning the 1982 edition into a database. Very special thanks to Billie Thomason, who input all the new data into the computer from 3x5 cards and handwritten notes and worked to maintain a consistency in the entry forms with a minimum of errors. Thanks to all the librarians who responded with their data and suggestions and therefore made this a better tool.

## USER'S GUIDE

Titles are alphabetized by title, disregarding initial articles. Titles with initials, abbreviations, and acronyms are filed at the beginning of each letter sequence. The place of publication of the first issue is given in parentheses after each title. In some cases additional places are given. Periodicals with the same title are subfiled alphabetically by place of publication. The OCLC number for those in the OCLC database is given to the right of each entry.

Continues and supersedes are used in the following way in this list. If the periodical changed names and started again with volume one, it is said to supersede the previous title. If the periodical changed names, but continued the volume numbering of the previous title, it is said to continue the previous title. Series numbers may have been assigned when a periodical has published more than one volume one.

Print holdings are given first, followed by microform holdings. M:P indicates a positive microform; M:N indicated a negative microform; MC indicates microcard. Brackets indicate incomplete volumes. A dash (-) following a volume at the end of the holdings statement indicates that a library holds all volumes after the volume before the dash and continues to receive it.
